Weekly workout

Day 1: CHEST & SHOULDERS (3 Rounds - 20 Reps Each)

1. Dumbbell Arnold Press [PUSH]

- **Visual Setup:** Seated on a bench or standing tall. Start with dumbbells held at shoulder level, palms facing your chest (like the top of a bicep curl).
- **Execution:** Press the dumbbells smoothly overhead while rotating your wrists outward, finishing with palms facing forward at the top. Reverse the rotation back to the starting position as you lower.
- **Target:** Anterior deltoids, medial deltoids, upper chest, triceps.

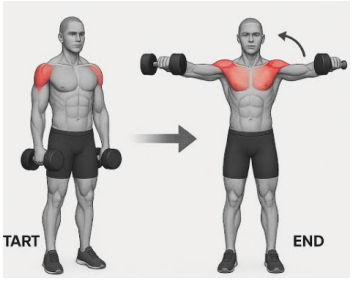

2. Dumbbell Upright Row [PULL]

- **Visual Setup:** Standing tall holding dumbbells in front of thighs with an overhand grip, palms facing your body.

- **Execution:** Pull the weights vertically upward along your midline, leading with high elbows until the dumbbells reach upper-chest level. Lower under control.
- **Target:** Upper trapezius, lateral deltoids, biceps.

3. Single-Arm Lateral Raise [PUSH / SHOULDER ELEVATION]

- **Visual Setup:** Stand holding a dumbbell in one hand at your side, slight forward torso lean, opposite hand braced on hip.
- **Execution:** Raise the dumbbell out to your side with a slight bend at the elbow. Pause briefly at peak contraction before lowering slowly.
- **Target:** Lateral deltoids (shoulder cap width).

4. Dumbbell Face Pull Row [PULL]

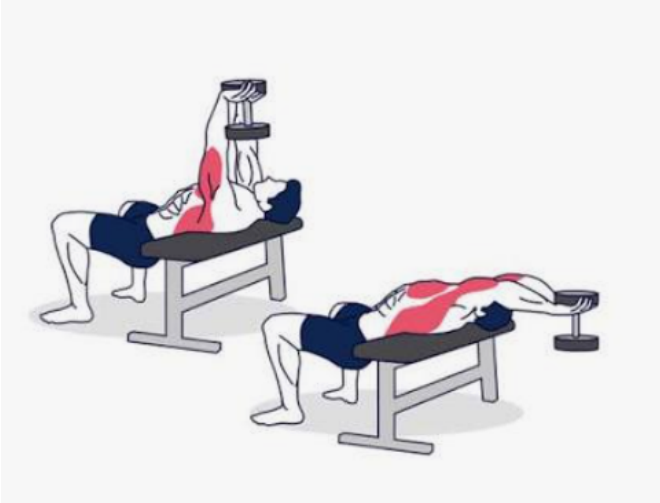

- **Visual Setup:** Torso hinged forward at a 45-degree angle (or chest supported against an incline bench), holding dumbbells with an overhand (pronated) grip, palms facing towards you.
- **Execution:** Pull the dumbbells upward towards face/eye level, driving elbows high and wide while externally rotating the shoulders so the weights finish alongside your ears. Squeeze the rear deltoids and upper back at the peak before lowering under control.
- **Target:** Posterior deltoids (rear delts), upper trapezius, rhomboids, rotator cuff.

5. Dumbbell Lateral Raise [PUSH / SHOULDER ELEVATION]

. **Visual Setup:** Stand tall with feet hip-width apart (or seated upright), holding dumbbells at your sides with palms facing inward, a slight 10-degree forward torso lean, and a soft bend in the elbows.
. **Execution:** Raise both dumbbells out to the sides in a wide arc, leading with your elbows until arms reach shoulder height (parallel to the floor). Pause briefly at peak contraction, then lower slowly with control.
. **Target:** Lateral deltoids (side shoulder caps), upper trapezius.

6. Dumbbell Pullover [PULL / EXTENSION]

. **Visual Setup:** Lie perpendicular across a flat bench (or flat lengthwise) with upper back and neck supported. Cup one dumbbell overhead with both hands forming a diamond grip under the top weight plate, arms extended with a soft bend in the elbows.

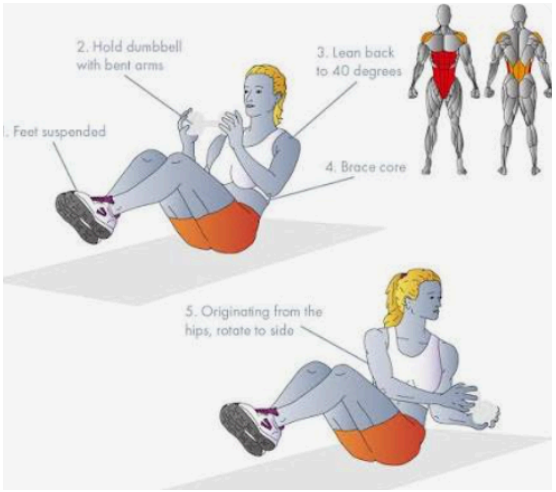

- **Execution:** Keeping elbow angle fixed, lower the dumbbell backward in a controlled arc behind your head until you feel a full stretch through your lats, serratus, and chest. Engage your lats to pull the dumbbell back over your chest.
- **Target:** Latissimus dorsi, serratus anterior, pectoralis major (chest), long head of triceps.

7. Flat Dumbbell Bench Press [PUSH]

- **Visual Setup:** Lie flat on a bench holding dumbbells at chest level with an overhand grip, elbows angled at roughly 45–60 degrees from your torso, feet planted firmly on the floor.
- **Execution:** Press dumbbells smoothly upward over the center of your chest until arms are extended without clashing the weights. Lower under control until dumbbells reach chest level.
- **Target:** Pectoralis major (middle/sternal chest), anterior deltoids, triceps.

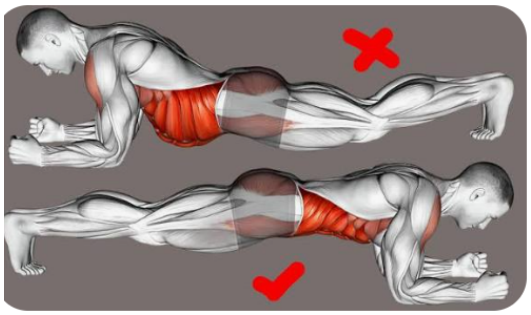

8. Russian Twist [CORE]

- **Visual Setup:** Sit on the floor with knees bent, feet elevated a few inches off the floor, leaning torso back at a 45-degree angle.

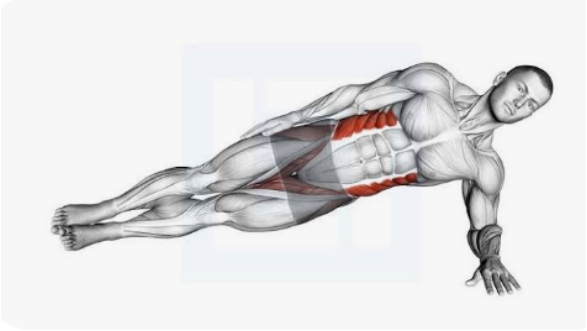

- **Execution:** Hold a dumbbell with both hands and rotate your torso smoothly from side to side, tapping the weight close to your hip on each side.
- **Target:** Internal and external obliques, transverse abdominis.

9. Plank [CORE]

- **Visual Setup:** Forearms on the floor, elbows aligned directly beneath shoulders, legs extended behind on balls of feet.
- **Execution:** Maintain a straight, rigid line from head to heels. Squeeze glutes, engage quads, and draw navel toward the spine without letting hips sag or pike up. Hold for 45–60 seconds.
- **Target:** Transverse abdominis, rectus abdominis, lower back, shoulder stabilizers.

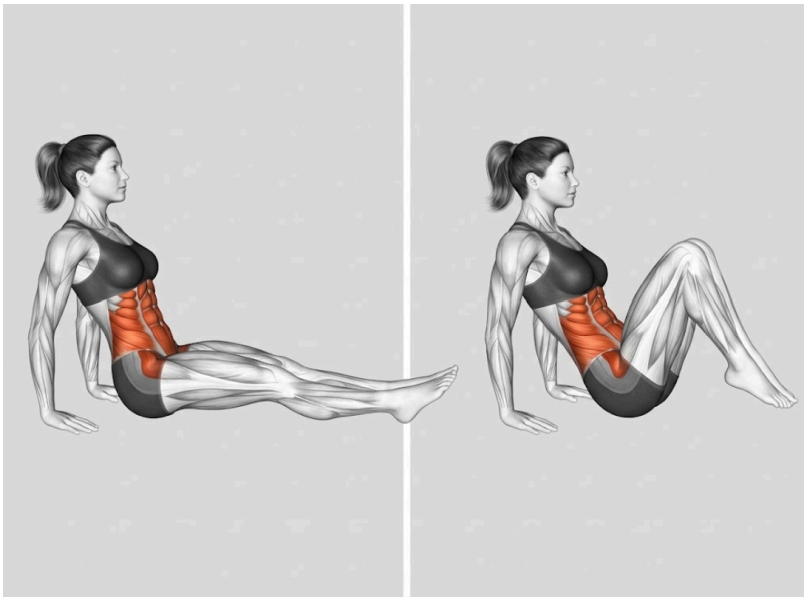

10. Side Plank [CORE]

ɔide Plank: Build Oblique and Lateral Cor.

- **Visual Setup:** Lie on your side propped up on one elbow/forearm, elbow directly below shoulder, feet stacked or staggered.
- **Execution:** Lift hips off the floor until your body forms a straight diagonal line from shoulders to feet. Brace the core and hold for 30–45 seconds per side.
- **Target:** Internal and external obliques, quadratus lumborum, gluteus medius.

11. Seated Knee Tuck [CORE]

. **Visual Setup:** Sit on the edge of a flat bench or floor, leaning torso back at a 45-degree angle with hands gripping the bench/floor behind hips for support. Extend legs straight out hovering off the ground.
. **Execution:** Pull your knees inward toward your chest while slightly crunching your upper torso forward. Pause and squeeze the abdominals, then slowly extend legs back out without letting feet touch the floor.
. **Target:** Lower rectus abdominis, hip flexors, transverse abdominis.

Day 2: UPPER BACK & ABS (3 Rounds - 20 Reps Each)

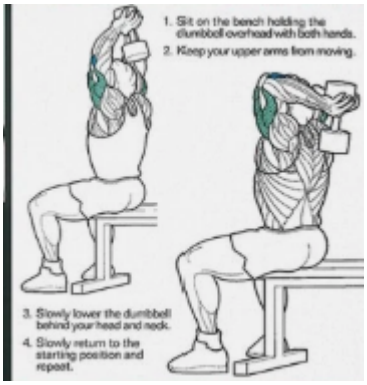

1. Bent-Over Two-Arm Dumbbell Row [PULL]

. **Visual Setup:** Feet hip-width apart, hinge hips backward at a 45-degree angle, flat back, arms hanging down holding dumbbells.

- **Execution:** Pull both dumbbells upward towards your hips/lower ribcage, squeezing your shoulder blades together tightly at the top.
- **Target:** Latissimus dorsi, rhomboids, posterior deltoids, biceps.

2. Dumbbell Triceps Extension [PUSH - TRICEPS]

- **Visual Setup:** Sit upright on a bench or floor holding one dumbbell overhead with both hands in a diamond shape beneath the top weight plate, elbows tucked close to ears.
- **Execution:** Keeping upper arms vertical and elbows pointing forward, bend elbows to lower the weight behind your head until your triceps are fully stretched. Press through triceps to extend arms back to the overhead lockout.
- **Target:** Triceps brachii (especially the long head).

3. Lying Dumbbell Triceps Extension (Skull Crushers) [PUSH - TRICEPS]

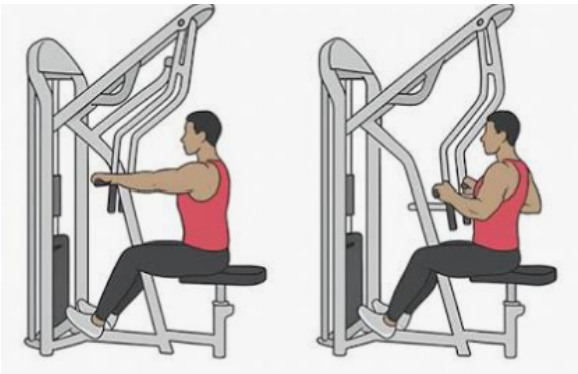

- **Visual Setup:** Lie flat on a bench or floor holding two dumbbells (or one dumbbell with both hands) directly over chest, arms vertical and palms facing inward.
- **Execution:** Keeping upper arms fixed and perpendicular to the floor, bend at the elbows to lower the dumbbells toward your temples/ears. Squeeze triceps to extend forearms back to starting position.
- **Target:** Triceps brachii (lateral and medial heads).

4. Bent-Over Rear Delt Fly [PULL]

- **Visual Setup:** Hinge torso forward until nearly parallel to the floor, holding light dumbbells hanging toward the ground.
- **Execution:** With a slight elbow bend, raise both arms outward to the sides in a wide reverse-fly arc until level with your torso, pinching rear delts.
- **Target:** Posterior deltoids, rhomboids, middle traps.

5. Seated Row (Machine) 70lbs [PULL - BACK]

- **Visual Setup:** Sit tall on the machine with chest resting against the pad, feet flat on footrests, arms fully extended grasping handles with neutral or overhand grip. Set weight to 70 lbs.
- **Execution:** Pull the handles back towards your abdomen/lower ribs, driving elbows backward and squeezing shoulder blades together firmly. Slowly control the return without letting weight stack slam.
- **Target:** Latissimus dorsi, rhomboids, middle trapezius, biceps.

6. Single Arm Row [PULL - BACK]

- **Visual Setup:** Place one knee and same-side hand on a flat bench for support with spine flat and parallel to floor. Hold dumbbell in outside hand hanging straight down.
- **Execution:** Drive elbow straight back towards your hip, pulling the dumbbell to your ribcage while keeping torso stationary. Lower slowly to full stretch.
- **Target:** Latissimus dorsi, posterior deltoids, rhomboids, biceps.

7. Flutter Kicks [CORE]

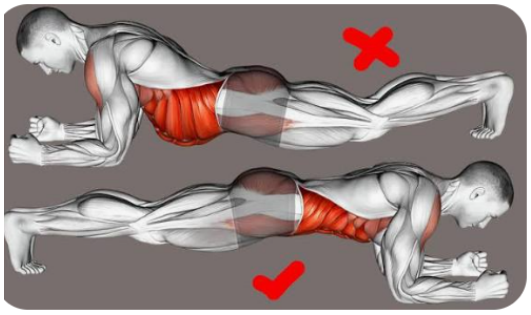

- **Visual Setup:** Lie flat on your back with arms along your sides or hands tucked under hips for lumbar support.
- **Execution:** Lift head, neck, and shoulder blades slightly off the floor and hover straight legs a few inches above the ground. Alternate small, rapid vertical kicks with pointed toes, keeping lower back pressed firmly into the floor. Complete 20 reps per leg.
- **Target:** Lower rectus abdominis, hip flexors.

8. Leg Overs [CORE]

- **Set Up:**
  - Sit tall on the floor (or on the edge of a sturdy chair/bed if floor sitting strains your back or knees).
  - Extend your legs straight out in front of you with toes pointed or flexed upward.
  - Place your chosen object (e.g., a kettlebell or water bottle) beside one foot or centered in front of you.
- **Position Your Upper Body:**
  - Place your hands on the floor slightly behind your hips for support (leaning back slightly increases the core challenge; sitting completely upright isolates the hip flexors more)
-

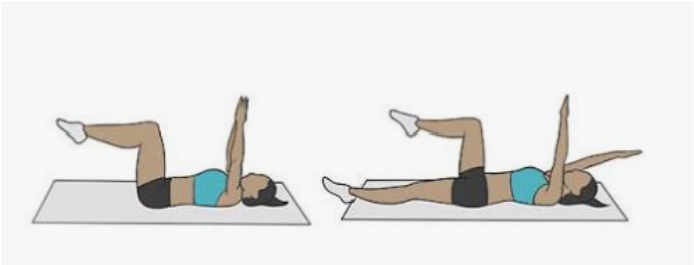

9. Plank [CORE]

- **Visual Setup:** Forearms on the floor, elbows aligned directly beneath shoulders, legs extended behind on balls of feet.
- **Execution:** Maintain a straight, rigid line from head to heels. Squeeze glutes, engage quads, and draw navel toward the spine without letting hips sag or pike up. Hold for 45–60 seconds.

. **Target:** Transverse abdominis, rectus abdominis, lower back, shoulder stabilizers.

10. Dead Bug [CORE]

. **Visual Setup:** Lie flat on back with arms extended straight up towards ceiling and knees bent at 90 degrees above hips (shins parallel to floor). Press lower back flat into floor.
. **Execution:** Simultaneously lower your right arm behind your head and extend your left leg straight out hovering above floor. Return to center and repeat on opposite side (left arm, right leg).
. **Target:** Transverse abdominis, deep core stabilizers, hip flexors.

Day 3: LEGS & GLUTES (4 Rounds - 20 Reps Each) - pair with elliptical

1. Straight Leg Dumbbell Lifts (Romanian Deadlift) [PULL - POSTERIOR CHAIN]

. **Visual Setup:** Stand tall holding dumbbells in front of thighs, feet hip-width apart.

. **Execution:** Keeping knees soft but stationary, push hips backward and lower weights down the front of your shins until hamstrings are on full stretch. Squeeze glutes and drive hips forward to return to standing.
. **Target:** Hamstrings, gluteus maximus, erector spinae.

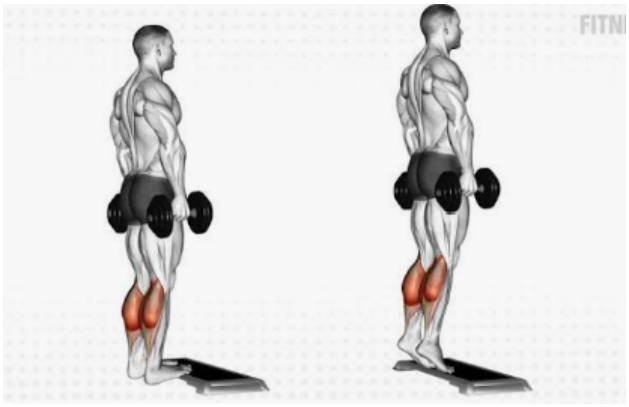

2. Goblet Squat [PUSH - LEGS]

. **Visual Setup:** Stand with feet shoulder-width apart, toes turned slightly out. Hold a single dumbbell vertically against your upper chest with both hands cupping the top head.
. **Execution:** Push hips back and bend knees, sitting down between heels until thighs break parallel. Keep chest proud and elbows inside knees. Drive through midfoot/heels to stand up.
. **Target:** Quadriceps, gluteus maximus, adductors, core.

3. Bulgarian Split Squat [PUSH - LEGS]

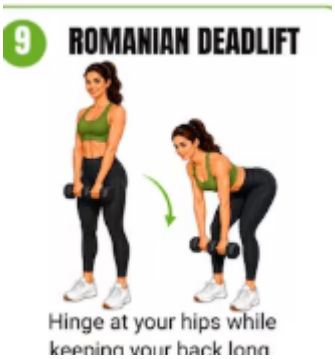

5. Dumbbell Romanian Deadlift [PULL - POSTERIOR CHAIN]

- **Visual Setup:** Stand 2-3 feet in front of a flat bench. Place top of one rear foot onto the bench behind you, holding dumbbells at your sides.
- **Execution:** Lower back knee straight down toward the floor until front thigh is parallel to the ground. Drive through front heel to return to top position.
- **Target:** Quadriceps, glutes, hamstrings, balance/stabilizers.

4. Standing Dumbbell Calf Raises [PUSH - CALVES]

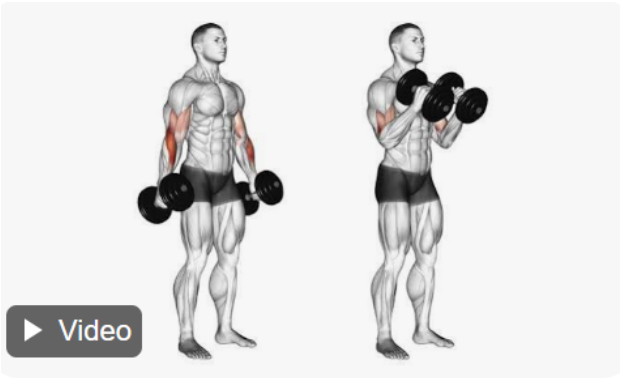

- **Visual Setup:** Stand tall with balls of feet on a raised edge or flat floor, holding dumbbells at your sides with arms straight.
- **Execution:** Drive up onto the balls of your feet, elevating heels as high as possible. Pause for 1-2 seconds at peak contraction, then lower slowly below level to get a deep stretch.
- **Target:** Gastrocnemius, soleus (calves), ankle stabilizers.
- **Visual Setup:** Stand tall holding dumbbells in front of thighs, feet hip-width apart, slight soft bend in knees.
- **Execution:** Push hips backward as if touching a wall behind you, sliding dumbbells down along shins until hamstrings are on full stretch. Squeeze glutes and drive hips forward to lockout.
- **Target:** Hamstrings, gluteus maximus, lower back.

6. Seated Leg Curl Machine [PULL - HAMSTRINGS]

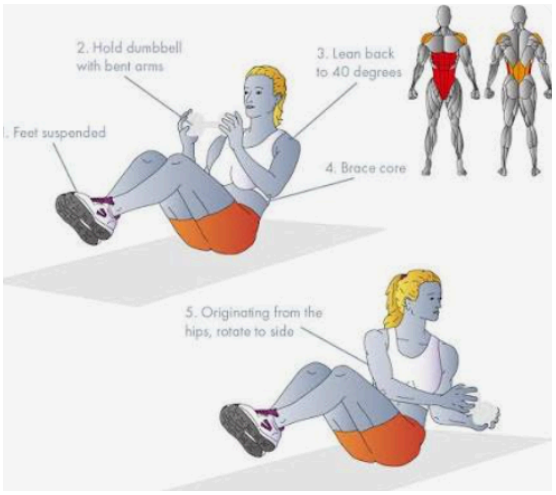

- **Visual Setup:** Sit on machine with back against pad, thighs secured under thigh pad, and lower leg lever pad resting against the back of your lower calves/Achilles.
- **Execution:** Flex knees to curl the lever down and under towards glutes, squeezing hamstrings at peak contraction. Control the weight slowly back to starting position.
- **Target:** Hamstrings (biceps femoris, semitendinosus, semimembranosus).

7. Hammer Curl [PULL - BRACHIALIS / BICEPS]

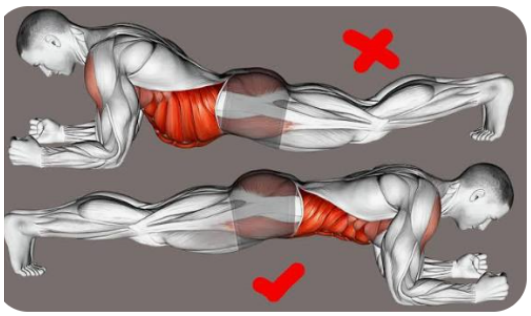

- **Visual Setup:** Stand tall with feet hip-width apart holding dumbbells at your sides, palms facing each other (neutral grip).
- **Execution:** Keeping elbows pinned to your ribs, curl dumbbells upward toward shoulders while maintaining neutral grip. Squeeze at top and lower under control.
- **Target:** Brachialis, brachioradialis (forearms), biceps brachii.

8. Russian Twist [CORE]

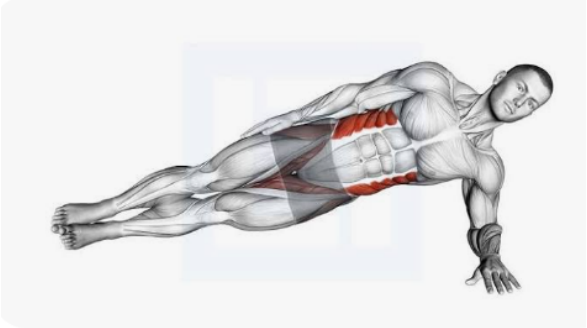

- **Visual Setup:** Sit on the floor with knees bent, feet elevated a few inches off the floor, leaning torso back at a 45-degree angle.
- **Execution:** Hold a dumbbell with both hands and rotate your torso smoothly from side to side, tapping the weight close to your hip on each side.
- **Target:** Internal and external obliques, transverse abdominis.

9. Plank [CORE]

- **Visual Setup:** Forearms on the floor, elbows aligned directly beneath shoulders, legs extended behind on balls of feet.
- **Execution:** Maintain a straight, rigid line from head to heels. Squeeze glutes, engage quads, and draw navel toward the spine without letting hips sag or pike up. Hold for 45–60 seconds.
- **Target:** Transverse abdominis, rectus abdominis, lower back, shoulder stabilizers.

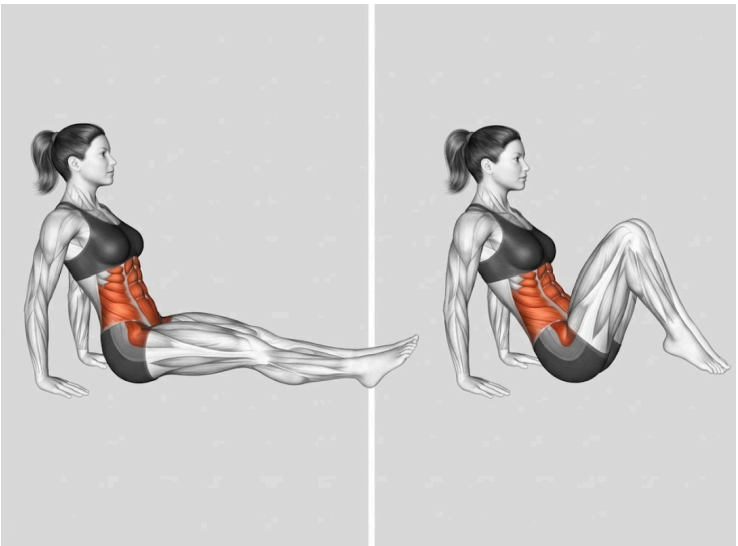

10. Side Plank [CORE]

Side Plank: Build Oblique and Lateral Cor.

. **Visual Setup:** Lie on your side propped up on one elbow/forearm, elbow directly below shoulder, feet stacked or staggered.
. **Execution:** Lift hips off the floor until your body forms a straight diagonal line from shoulders to feet. Brace the core and hold for 30–45 seconds per side.
. **Target:** Internal and external obliques, quadratus lumborum, gluteus medius.

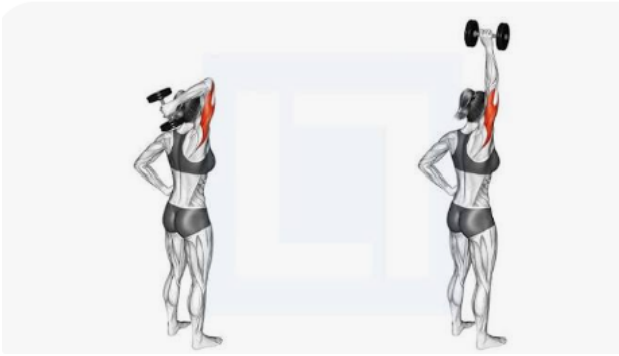

11. Seated Knee Tuck [CORE]

. **Visual Setup:** Sit on the edge of bench or floor, hands braced behind hips, legs hovering extended.
. **Execution:** Draw knees toward chest while pulling torso slightly forward; extend legs back out with control.
. **Target:** Lower abdominals, hip flexors.

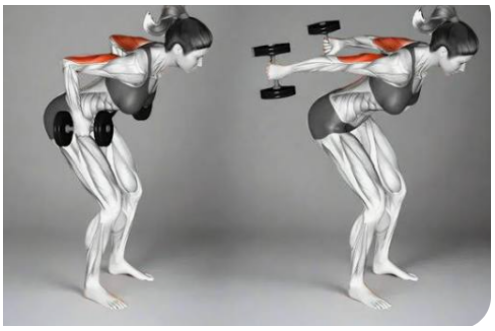

Day 4: CHEST & ABS (3 Rounds - Target Protocol)

. **1. One-Arm Standing Dumbbell Extension [PUSH - TRICEPS]:** 8kg x 12 reps

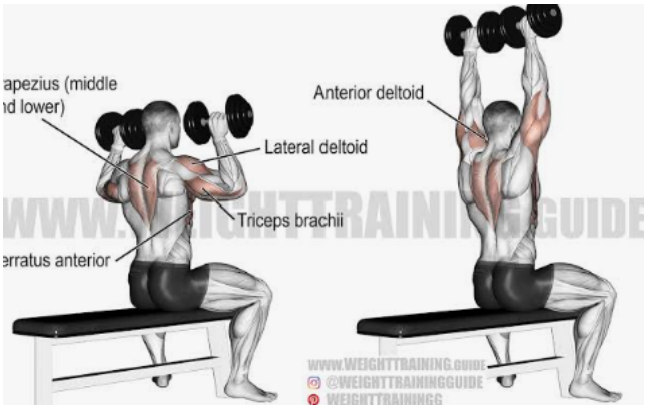

. **Form:** Hold one 8kg dumbbell vertically overhead. Keeping upper arm pinned beside ear, bend elbow to lower dumbbell behind your neck, then extend arm back straight up.

. **2. Dumbbell Triceps Kickback [PUSH - TRICEPS]:** 9kg x 15 reps

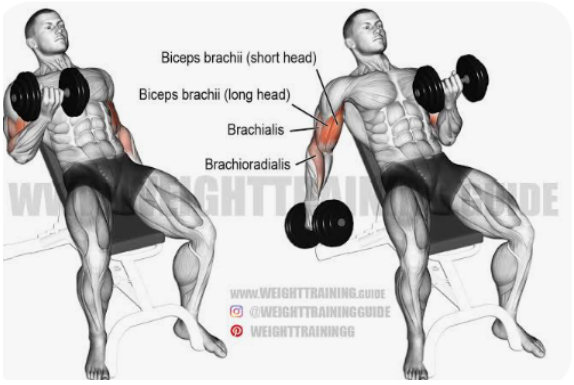

. **Form:** Hinge forward with elbow pulled high and tight to your torso. Keep upper arm locked parallel to the floor, straighten forearm backward until arm is locked, squeezing tricep.

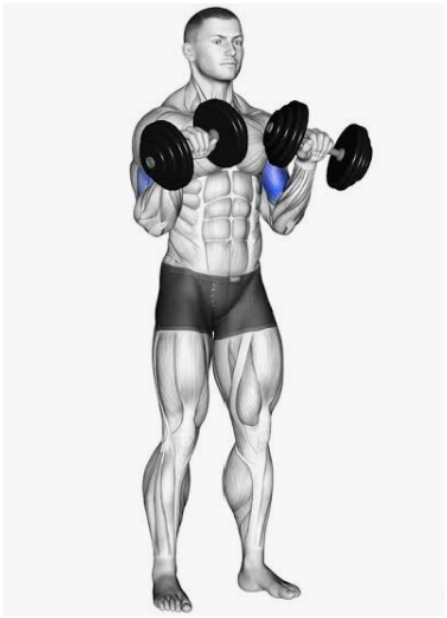

. **3. Seated Dumbbell Shoulder Press [PUSH - SHOULDERS]:** 7kg x 12 reps

. **Form:** Sit upright with back supported. Hold dumbbells at ear height and press vertically overhead until arms are extended, avoiding lower back arching. Squeeze deltoids at peak and lower back to ear height.

. **1. Incline Dumbbell Curl [PULL - BICEPS]:**

- 

- **Visual Setup:** Set bench to a 45–60 degree incline. Lie back letting arms hang fully down to stretch bicep long head, holding dumbbells with palms facing forward.
- **Execution:** Keeping upper arms pinned back, curl dumbbells upward toward shoulders, squeezing biceps at the top. Lower slowly under control.
- **Target:** Biceps brachii (especially the long head).
-
- **3. Zottman Curl [PULL - BICEPS & FOREARMS]:**
- 
- **Visual Setup:** Stand tall holding dumbbells at your sides with palms facing forward.
- **Execution:** Curl dumbbells upward with palms facing up (supinated); at the top, rotate wrists so palms face down (pronated), and slowly lower under control in the pronated position.
- **Target:** Biceps brachii, brachioradialis, forearm extensors.

6. Flutter Kicks [CORE]

- **Visual Setup:** Lie flat on your back with arms along your sides or hands tucked under hips for lumbar support.
- **Execution:** Lift head, neck, and shoulder blades slightly off the floor and hover straight legs a few inches above the ground. Alternate small, rapid vertical kicks with pointed toes, keeping lower back pressed firmly into the floor. Complete 20 reps per leg.
- **Target:** Lower rectus abdominis, hip flexors.

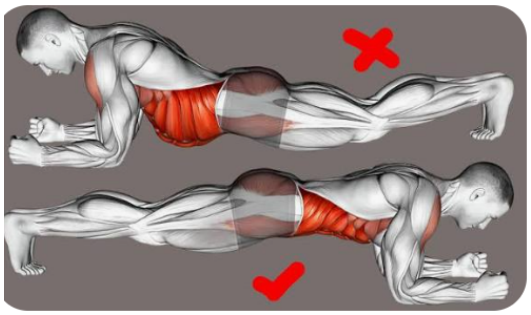

7. Leg Overs [CORE]

- **Set Up:**
  - Sit tall on the floor (or on the edge of a sturdy chair/bed if floor sitting strains your back or knees).
  - Extend your legs straight out in front of you with toes pointed or flexed upward.
  - Place your chosen object (e.g., a kettlebell or water bottle) beside one foot or centered in front of you.
- **Position Your Upper Body:**

        - Place your hands on the floor slightly behind your hips for support (leaning back slightly increases the core challenge; sitting completely upright isolates the hip flexors more)
    - **Execute the Lift:**
        - Brace your core and keep your knee locked straight.
        - Lift your foot/feet up and over the object in a controlled arc.
        - Tap your heel lightly on the floor on the opposite side
    -

8. Plank [CORE]

- **Visual Setup:** Forearms on the floor, elbows aligned directly beneath shoulders, legs extended behind on balls of feet.
- **Execution:** Maintain a straight, rigid line from head to heels. Squeeze glutes, engage quads, and draw navel toward the spine without letting hips sag or pike up. Hold for 45–60 seconds.
- **Target:** Transverse abdominis, rectus abdominis, lower back, shoulder stabilizers.

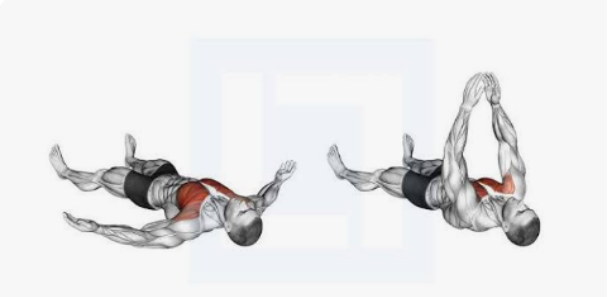

9. Dead Bug [CORE]

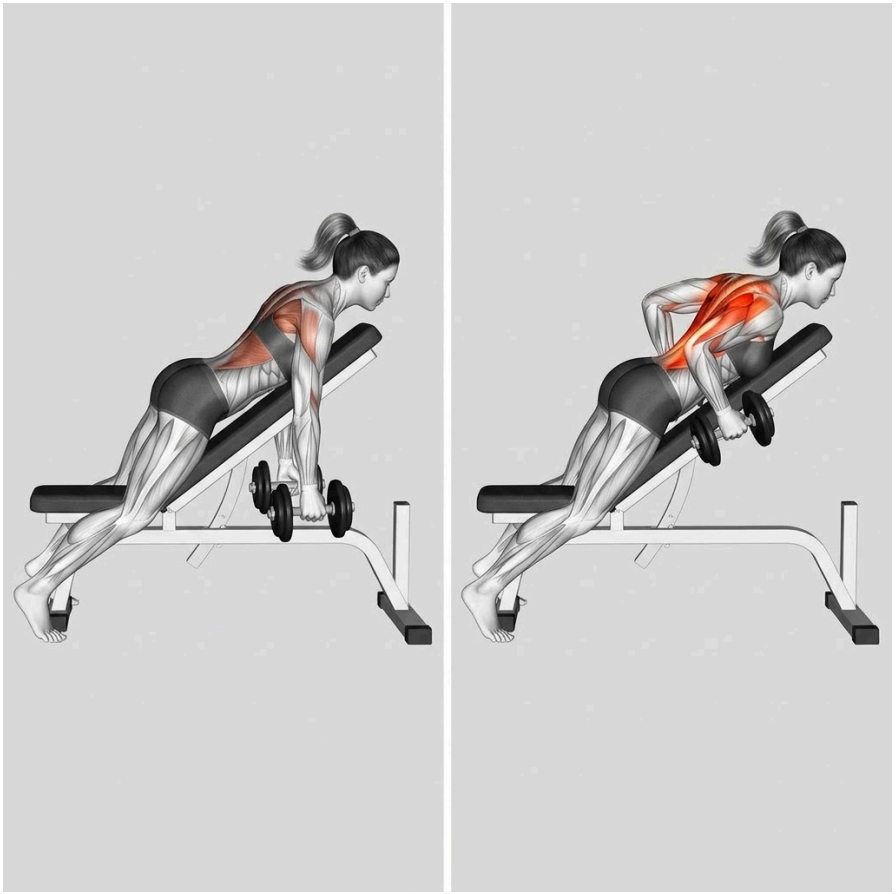

- **Visual Setup:** Lie on back with lower back imprinted into floor, arms reaching to ceiling, knees at 90 degrees.

- **Execution:** Slowly reach opposite arm overhead and opposite leg straight out hovering above floor, then return and alternate sides.
- **Target:** Deep core, transverse abdominis, anterior chain.
-

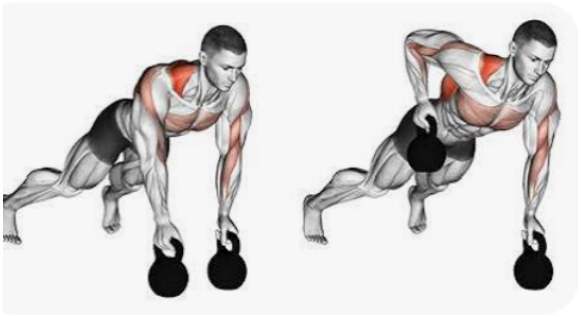

Other:

- **Chest Fly [PUSH - CHEST]**
  
  - **Visual Setup:** Lie flat on a bench holding dumbbells directly over your chest with palms facing each other, slight bend in elbows.
  - **Execution:** Lower the weights out to your sides in a wide hugging arc until you feel a deep chest stretch. Contract your pecs to pull the dumbbells back up to the center.
  - **Target:** Pectoralis major (sternal fibers), anterior deltoids.
- **Incline Row [PULL - BACK]**

- **Visual Setup:** Set bench to a 30–45 degree incline. Lie chest-down with neck neutral and arms hanging straight down holding dumbbells.
- **Execution:** Row dumbbells up toward your hips, flaring elbows slightly and driving shoulder blades together. Lower under control.
- **Target:** Rhomboids, mid/lower trapezius, latissimus dorsi, posterior deltoids.

Renegade Row [PULL - BACK & CORE]:

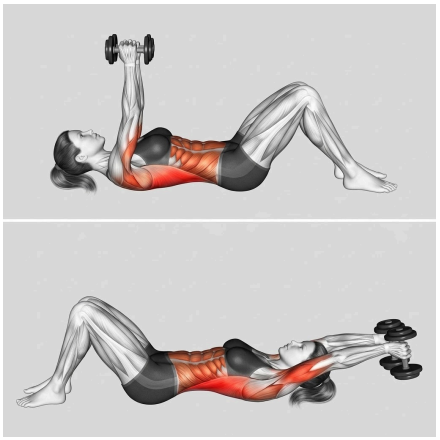

enegade Row: How-to, Tips, Variations,...

- **Visual Setup:** Begin in a high plank position holding hex dumbbells on floor beneath shoulders, feet set slightly wide for stability.

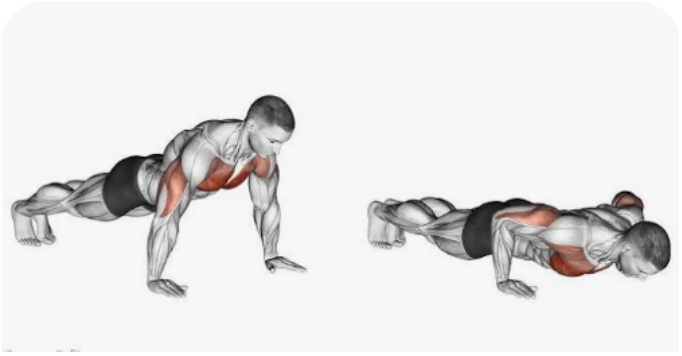

- **Execution:** Bracing core to prevent hip rotation, row one dumbbell up to ribcage, lower back to floor, and repeat on opposite side.
- **Target:** Latissimus dorsi, upper back, obliques, transverse abdominis.

- **Lying Overhead Reach [PULL / CORE]:**

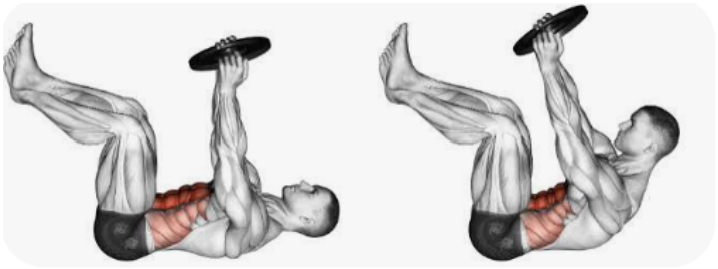

- **Visual Setup:** Lie flat on back with knees bent at 90 degrees in tabletop or feet planted, holding a dumbbell in both hands overhead.
- **Execution:** Keeping core engaged and ribs pulled down against the floor, reach dumbbell back overhead in a slow arc, then pull back up over chest.
- **Target:** Lats, serratus anterior, rectus abdominis.

Press Up (Push Up) [PUSH]

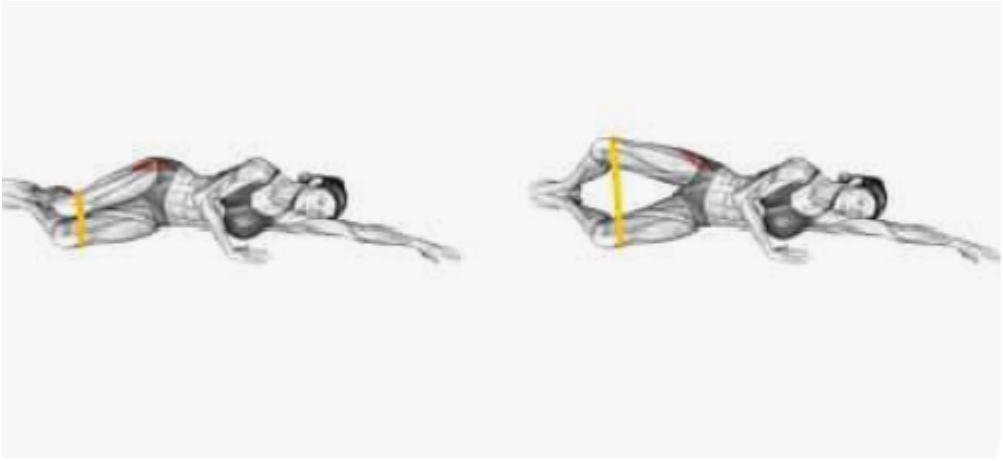

- **Visual Setup:** Hands placed slightly wider than shoulder-width, fingers pointing forward, forming a straight plank from head to heels.
- **Execution:** Lower your chest towards the floor until your elbows reach a 90-degree angle. Press through your palms and chest to return to the top lockout.
- **Target:** Pectoralis major, anterior deltoids, triceps, core stabilisers.

Weighted Crunch [CORE]

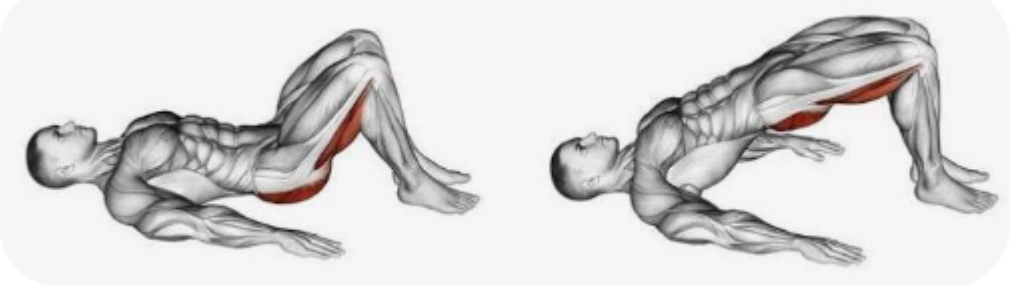

. **Visual Setup:** Lie on your back, knees bent, feet flat on the floor, holding a dumbbell or weight plate across your upper chest.
. **Execution:** Contract your abdominal wall to lift your shoulder blades and ribcage off the floor towards your knees. Exhale at the top.
. **Target:** Rectus abdominis (upper abs).

Clamshells [LEGS / GLUTES]

. **Visual Setup:** Lie on your side with hips stacked, knees bent at a 90-degree angle, feet together.
. **Execution:** Keeping heels glued together, open your top knee towards the ceiling as high as possible without rotating your pelvis backward. Lower and repeat.
. **Target:** Gluteus medius, hip external rotators.

3. Glute Bridge [LEGS / GLUTES]

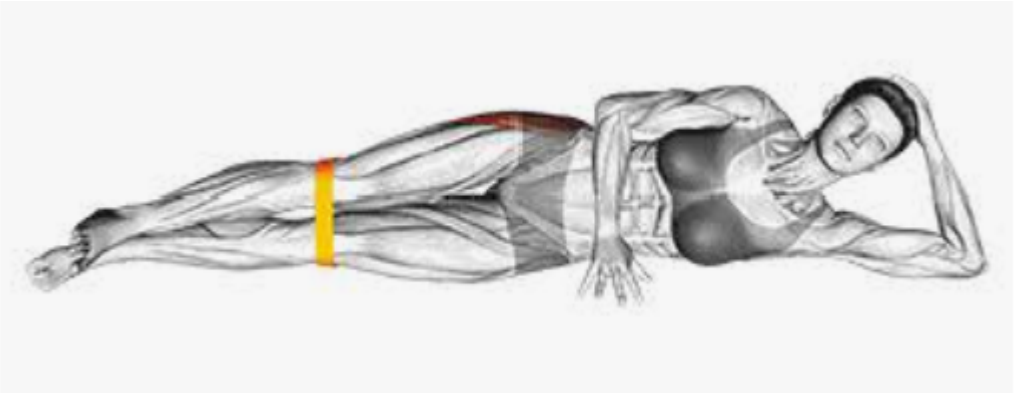

- **Visual Setup:** Lie on your back with knees bent and feet flat on the floor close to glutes. Place a dumbbell across your hip crease.
- **Execution:** Drive through your heels to raise your hips until knees, hips, and shoulders form a straight diagonal line. Squeeze glutes hard at the top.
- **Target:** Gluteus maximus, hamstrings.

4. Fire Hydrant [LEGS / GLUTES]

- **Visual Setup:** On hands and knees in a tabletop position with wrists under shoulders and knees under hips.
- **Execution:** Keeping knee bent at 90 degrees, raise one leg out to the side away from the body like a dog at a fire hydrant, hold for a count, and lower.
- **Target:** Gluteus medius, tensor fasciae latae, hip abductors.

Banded Side Lifts [LEGS / GLUTES]

. **Visual Setup:** Place a resistance loop around ankles or just above knees. Stand tall (or lie on side).
. **Execution:** Lift working leg straight out to the side against resistance, keeping toes pointed slightly inward to keep tension on the side glute.
. **Target:** Gluteus medius, lateral hip stabilizers.

Banded Side Walk [LEGS / GLUTES]

. **Visual Setup:** Place a resistance loop band around ankles or just above knees. Stand in an athletic quarter-squat stance with feet hip-width apart and hands at chest.
. **Execution:** Step laterally to one side, maintaining continuous outward tension on the band without letting knees cave inward, then step the trailing foot in to hip-width. Repeat for 15–20 steps in each direction.
. **Target:** Gluteus medius, gluteus minimus, tensor fasciae latae, hip abductors.
